

A close-up photograph of a heavy-duty metal padlock, likely made of brass or a similar alloy. The padlock has a rectangular body with rounded corners and a smaller rectangular shackle on the left side. The front face features a large circular keyhole in the center and a smaller circular button with a square-shaped hole to its right. The metal surface shows some signs of wear and discoloration.

A large, ornate metal key, likely a skeleton key, positioned vertically. The key has a long, slender shaft and a circular bow at the top. The bit at the bottom is simple and functional, with several notches. The metal has a polished, reflective surface.
